 Nothing Better

As tall and stately as the Darwins, Breeders are, perhaps, the most interesting class of all Tulips, for in them we find Nature's happiest color-combinations in harmonious blendings of purple and bronze, yellow and bronze, brown and orange, and various shades and tones of buff and bronze. Breeder Tulips have become extremely popular not only because of their peculiar odd colors, but also for their great lasting qualities, huge size of their flowers and stems. Plant them 5 inches deep to the solid beds or in clumps of twelve to twenty-five.

Alice. 28 in. Deep Havana brown; extremely large. \$2 per doz., \$14 per 100.

Bacchus. 30 in. Dark violet-blue; enormous broad flower on strong, stiff stems; very vigorous. \$2 per doz., \$15 per 100.

Black Chief. 26 in. Purplish black. \$1 per doz., \$8 per 100, \$70 per 1,000.

Bronze Queen. 26 in. Soft buff, tinted apricot, inside golden bronze. 80 cts. per doz., \$6 per 100, \$55 per 1,000.

Dom Pedro. 28 in. A unique shade of dull brown, shaded maroon, inside rich mahogany. \$1.75 per doz., \$12 per 100.

Fairy (Panorama). 30 in. Terra-cotta-orange and bronze, with a blending of mahogany. \$1.25 per doz., \$8.50 per 100.

Feu Ardent. 30 in. An enormous, cup-shaped, mahogany-red flower—brilliant, striking color. \$2 per doz., \$15 per 100.

Godet Parfait. 30 in. Bright violet, white base; very large. \$1.75 per doz., \$12 per 100.

Golden Bronze (Toison d'Or). 22 in. Old-gold, shaded bronze. \$1.25 per doz., \$9 per 100.

Jaune d'Œuf (Sunrise). 22 in. Ruddy apricot, edged bronze-yellow. \$1 per doz., \$8 per 100, \$75 per 1,000.

Louis XIV. 30 in. Deep purple, flushed bronze, with a broad margin of golden brown. A grand Tulip with broad petals of enormous size. \$2.50 per doz., \$18 per 100.

Lucifer (Gorgeous). 26 in. Terra-cotta-orange; enormous flower. A glorious Tulip. \$3.25 per doz., \$24 per 100.

McMahon (Turenne). 30 in. Dark blue which intensifies with age, heavily flushed golden bronze at margin. \$2 per doz., \$14 per 100.

Medea. 30 in. Crushed strawberry—a lovely blending of salmon, bronze and pink. \$1.35 per doz., \$9 per 100, \$85 per 1,000.

Plutarch. 25 in. Bronze with a light terra-cotta shading. \$1.50 per doz., \$10 per 100.

Prince of Orange (Orange Beauty). 25 in. Golden terra-cotta-orange, flushed golden bronze at edges. \$2 per doz., \$15 per 100.

Velvet King (Dreadnought). 28 in. A true royal purple Tulip of huge size and strength. \$1.75 per doz., \$12 per 100.

Yellow Perfection. 25 in. Bronzy yellow, edged golden bronze. \$1.50 per doz., \$11 per 100.

Zebrina. 26 in. Coffee-brown. \$1.50 per doz., \$10 per 100, \$95 per 1,000.

A splendid Breeder mixture of very fine varieties. \$1 per doz., \$7 per 100, \$68 per 1,000.

Tulipa Clusiana (The Lady Tulip). A lovely type of miniature or Tom Thumb Tulip of perfect form. White with heavy deep pink stripes. Most attractive in clumps in the rockery or for borders. 90 cts. per doz., \$7 per 100, \$66 per 1,000.

COTTAGE TULIPS

A glorious group of Tulips particularly adapted for naturalizing. Many of these varieties have been found growing about the country houses and cottages in England and France for many years, hence the name. They are charming in groups in the borders and among shrubs and are absolutely hardy. They have stately flowers with long, narrow cups, some elongated flowers, with pointed petals beautifully reflexed at the edges; many of them sweet scented. Plant same way as all late Tulips—5 inches deep to the bottom of the bulb and 6 inches apart.

Argo. Golden bronze, beautifully stippled orange at edge of petals. \$2.25 per doz., \$16 per 100.

Avis Kennicott. 25 in. Chrome-yellow, with black base. Long flower with reflexed, pointed petals. \$2 per doz., \$15 per 100.

The Fawn. 20 in. Pale rose-fawn, changing to blush-rose. 80 cts. per doz., \$6 per 100, \$55 per 1,000.

SIRENE. A True Lily Tulip

This is a new Cottage variety of rare charm, with its beautiful and most elegant lily-shaped flowers towering erect on long straight stems. Especially attractive in clumps through the hardy border or among shrubs. It is a lovely cerise-pink, with paler pink at the margins of the segments and a pure white base. \$1.25 per doz., \$9 per 100, \$85 per 1,000.

Beautiful Darwin Tulips

These are the glory of the spring garden with their lovely cups brimming with color and nodding a merry "Good morning" to you every day for weeks. Tall and stately with huge flowers towering erect on strong stems, they at once compel admiration and delight. Plant the bulbs 5 inches deep to the bottom of the bulb and 6 inches apart, either in clumps or groups of twenty-five or more, or in beds. Any time between October 15 and November 10 is the best time to plant, although it may be done until the ground freezes hard.

PARROT TULIPS MAY-FLOWERING

These are most attractive because of their fantastic forms and colorings, long irregular petals, slashed and laciniated at the edges and beautifully marked. Interesting in the garden and unusually attractive in vases and baskets. Plant them 5 inches deep to the bottom of the bulbs and 6 inches apart.

THE HERALDS OF SPRING

The embargo on these lovely spring beauties has been temporarily lifted, so that we may at least import them this season, and this may be your last chance to buy imported bulbs of these invaluable early spring flowers. Plant them freely through your lawn, shrubbery, and perennial borders and in the rockery—they will yield rich dividends of pleasure as they increase in beauty and numbers from year to year.

TOP ROOTS (Exhibition Bulbs)

A special pick of the largest bulbs produced in Holland. Sound, plump, and well matured, producing strong spikes of great length—you can buy no better. This size should always be selected for pot or glass culture, as they are far more vigorous in growth and produce larger and finer flower-trusses than the smaller bulbs. Unexcelled for outdoor planting for the same reason.

Hyacinths grow in any good garden soil, but a well-enriched soil induces more perfect growth and larger flower-spikes. Well-rotted barnyard manure, sheep-manure, or bone-meal, liberally applied, well dug in, and mixed with the soil is very helpful. Set bulbs 6 inches apart each way and 6 inches deep (to bottom of bulb). Hyacinths are perfectly hardy, but a light covering of salt-hay, leaves, or straw, after the ground is frozen, will prove beneficial.

Narcissi or Daffodils

What else so cheerful as the Daffodils that greet you early in spring? Of snowy white or mellow gold, they bloom profusely—almost anywhere, even in poor soil. Once planted, they multiply and bloom more abundantly and charmingly year after year without care.

Plant these bulbs generously on your lawn (for they will be through blooming before you cut the grass), along your shrubbery border, or fringing the roadside, or even in the nearby woods—anywhere they will grow unmolested—and you will reap unbounded joy every spring when they are in bloom. Plant bulbs 6 inches deep and the same distance apart. Daffodils are easily grown in pots for winter blooming, the Large Trumpet and Double-flowering varieties being especially good for that purpose.

NOTE. The importation of Narcissi bulbs from Holland and other countries is now prohibited by our Government, but sufficient notice has been given to enable us to grow them in our own country. We have chosen the state of Virginia where their culture has flourished since the days of the earliest settlers. After extensive tests we are satisfied that our Virginia-grown bulbs will produce just as fine results as those formerly imported, and while not, perhaps, as large in size, our American-grown bulbs are firmer and thoroughly acclimated, and no better stock can be had anywhere. For several years, until stocks are sufficiently increased, there will be a limited supply and we therefore advise early orders.

POLYANTHUS NARCISSI

These lovely flowering bulbs, formerly imported from the south of France, are now prohibited from import. Millions are now grown in this country in Florida, California, and other sections. We have made extensive tests with bulbs grown in all sections of the country and found that those grown on the Pacific coast have given the most satisfactory results. We have not, as yet, been able to get every bulb to bloom, and in our tests the California bulbs showed 85 per cent bloom. Also the American bulbs respond later, and if grown in dishes in pebbles and water, they should not be started before November. We are offering the best and most satisfactory bulbs produced in this country.

Paper-White Grandiflora. Pure white. The popular variety for early forcing. Jumbo Bulbs, \$2 per doz., \$14 per 100. Mammoth Bulbs, \$1.75 per doz., \$12 per 100, \$60 per 1,000.

Soleil d'Or. Golden yellow, sometimes called the Yellow Paper-White. Like the preceding, it is a great favorite with amateurs and gardeners for forcing.

Superb Modern Peonies

FOR FALL
PLANTING

A selection made now assures a special pick of the strongest roots
WE BEGIN TO SHIP OUR PEONY ROOTS IN SEPTEMBER—ORDER NOW

Always plant Peonies in the fall, for the roots are then in prime condition. It is not necessary to fertilize rich soil. In poor soil, the manure should be kept 10 inches from the surface, and well mixed with the subsoil; after planting, apply manure to surface over the first winter. Never allow manure to come in contact with the roots as it rots them. Set roots 2 feet or more apart and cover top eyes not more than 2 to 3 inches; deep planting often results in blind growth.

Our Peonies are extra-strong 1-year-old field-grown roots (not divisions)

Hardy Garden Lilies

No garden is complete without at least a few of these stately beauties, the blooming season of which may be extended from June to September if the proper varieties are planted. Large plantings of *L. candidum*, *L. tigrinum*, and the *Speciosum* varieties are recommended, and also the handsome early-blooming American varieties, *L. elegans* and *L. superbum*. They thrive in any well-drained garden soil, but do best in the hardy border or among shrubbery. Plant bulbs twice their depth and when frost sets in, cover with 4 to 6 inches of leaves or litter, which should be removed in the spring.

Madonna Lilies

Madonna Lilies to Glorify Your June Garden

LILIUM CANDIDUM

St. Joseph's or Annunciation Lily

Bloom profusely in June and are particularly charming if planted with delphiniums. Ten to fifteen magnificent blooms on stalks 4 to 5 feet tall may be expected from our special prize bulbs. To secure their beauty and a maximum degree of perfection, the bulbs must be planted in early September as they require a fall growth to bloom well the following year. Plant the bulbs 8 inches deep to the bottom of the bulb, and at least 10 to 12 inches apart.

Special Prize Bulbs, 75 cts. each, \$7.50 per doz.

Plant Your Roses in the Fall

IT IS THE BETTER TIME AND YOU HAVE MORE TIME TO DO IT RIGHT

Contrary to general belief, experiments have proven conclusively that Roses planted in late autumn will produce the best results. The success of the Rose in this country is largely a question of the selection of adaptable varieties and the preservation of a good, healthy root system. It is, therefore, apparent that plants freshly dug and transplanted in late fall should have an advantage over those dug in fall, stored over winter in sheds, and disturbed a second time when shipped in spring, for every time a plant is lifted, no matter how carefully done, the root system is disturbed, necessary fibrous roots are lost, and the vitality of the plant is lessened.

Buying Roses in the fall saves storage charges—it is cheaper.

Buying Roses in the fall assures you strong, healthy plants with good roots—very important.

Planting Roses in the fall gives you a better chance for the careful preparation of the soil and assures you best results.

In planting Roses, the graft or bud should be 2 inches below the soil. Before the ground freezes, draw the soil against the plant, the same as you would hill up potatoes, and cover with leaves or salt-hay. The chances of losses from fall planting will be less than from spring planting. *We ship about November 1—order now.*

Schling's Selected "Three Star" Quality, Hardy, Everblooming Hybrid Tea Roses

Here is your opportunity to procure our special "Three Star," extra-heavy Rose bushes at the price of ordinary ones. Unusually fine, extra-strong plants, heavily branched, that will bloom for you abundantly next summer—*better order them right now*, for our supply of these special stocky plants is limited.

Indoors—Right in Your Own Home Grow Bulbs for Winter Cheer in Schling's Prepared Bulb Fiber

And no need of ugly pots either! Use a bowl of your favorite color blending with the furnishing scheme of the room. This will lend an additional charm to your plant—you will enjoy it so much more.

Our Bulb Fiber is a complete substitute for soil scientifically prepared for use in receptacles without drainage. It is clean and odorless; no saucers necessary; no fear of staining the woodwork or table coverings. And bulbs really grow better in it than in soil for it absorbs and holds an even moisture and on account of its fluffiness allows the roots to penetrate freely. This Fiber is cleverly impregnated with plant-food in such a manner that it becomes available gradually but continually as required by the plants to assure a steady, healthy, and vigorous growth.

Prices of Schling's Prepared Bulb Fiber, Quart 50 cts.,
Half-Peck \$1.25, Peck \$2.25, Bushel \$7

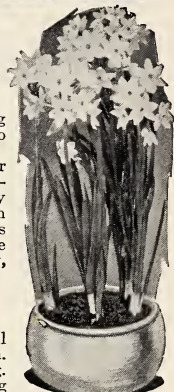

DIRECTIONS FOR USING BULB FIBER. Wet the Fiber thoroughly until it has absorbed all the water it can hold. This is best done in a pail or pan. Then squeeze out nearly all the water and it will be just right for planting. Fill the bowl three-fourths full, or to within a few inches of the top, according to the size of the bulb. Press down gently (never pack it down), set bulbs at the proper distances, and fill up with Fiber. Press it gently around the bulbs but *don't* pack it down. Keep the Fiber damp by spraying it lightly every day but never allow it to become too wet. All bulbs except Freesias, Callas, and Lilies-of-the-Valley should be kept in a dark place to develop roots before sprouting. Hyacinths, Daffodils, and Tulips require from four to six weeks; Paper-White and Soleil d'Or Narcissi and Chinese Lilies from two to three weeks. By bringing in a few bowls at intervals and making additional plantings one may enjoy blooming plants all through the winter months.
